 6.30pm - 8.30pm
 Buffet dinner
 and presentations.

Venue:
 St Vincent's Private
 Hospital Brisbane
 411 Main Street
 Kangaroo Point

*Parking is
 available on site.*

Join Neuropsychiatrist Professor Harry McConnell, Neurologist Dr Cullen O'Gorman, Psychiatrist Dr Rodney Marsh and Epilepsy Queensland for an evening of quality education focusing on the management and treatment of epilepsy.

Discussion includes:

- Seizure site and type – relationships to behaviour, mental health, long-term monitoring (Electroencephalogram – EEG) and treatment approaches.
- The role of the GP specialist, other specialists and the multidisciplinary team.
- The role of Epilepsy Queensland in education, support, advocacy and raising public awareness and understanding.

Epilepsy can affect anyone – any age and background. There are more people with epilepsy than with muscular dystrophy, cerebral palsy, Parkinson's disease and motor neurone disease combined.

Since 1969, Epilepsy Queensland Inc has been dedicated to improving the quality of life of people with epilepsy and their carers/families through advocacy, research, support and information. Considerable effort is put into increasing public awareness and raising community understanding of epilepsy.
